Obtaining Prof. Competence Certificate
Developing Marketing and Advertising Strategies

We help you to **extend the scope** of your services.

We make business expansion happen.

Since 2018; Yeye Agency provided a wide range of services to Arya Transport in their goal to expand to the EU. We recruited its first employee and obtained employment cards for their Turkish truck drivers, leasing new trucks, handling the bookkeeping, payroll and tax advisory for the company.

YeYe Agency transferred one logistic idea into reality. With the right inputs created an international business operating 800 tours annually between EU and Turkey, enabling more than 200 exporters to transport 20,000 tons of products. YeYe is managing its daily operations and helps in further development.

Yeye Agency guided the logistics company based in Germany to expand to Czechia. Since 2018, we helped them establish their company in the Czech Republic, obtained 14 employee cards for their Turkish truck drivers, registering their 2nd hand trucks in Czechia and guide authorising the changes in their management. Today, we are running its daily operation.

YeYe is a Business Development Agency that goes the extra mile to help new and already expanding companies grow locally and globally. We understand the complexity of running a business, especially in a new country, and have accumulated the experience and expertise to make it a success.

Over the years, we have fallen in love with the business of our customers in transportation, logistics, forwarding, technology and business services.

We make sure that they achieve their goals in any stage of the life cycle by planning, implementing and growing their operations on new markets.

How could we help you achieve your goals?
